Life Line Screening® is America's leading provider of quality health screenings. These tests quickly detect arterial abnormalities, which can cause disrupted blood flow. Our screenings are fast, accurate and available at an affordable rate.

A physician typically will not order an ultrasound evaluation for someone who has no symptoms of vascular disease or osteoporosis. Life Line Screening® enables you to be checked for vascular disease or osteoporosis as part of your own personal prevention plan. A board certified physician, who is fully insured and licensed to practice, reviews and confirms all screening results.

For Good Samaritan Health System employees, reimbursement is available through an employee's Healthcare Savings Account.

We provide these non-invasive, completely painless screenings using Doppler ultrasound technology.
